

# Mystery Quilt

## Fifth Month (January)

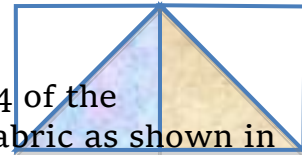

To easily jumble up paired combinations of half square triangles stack all the half-square triangle squares that are alike - setting the group A fabrics in one line and the group B fabrics in another.

1. Pair up a group A from the first stack with each of the 8 group B fabrics.
2. Arrange the pairs so that the squares are right sides together with the background fabric toward the top left and the A and B fabrics toward the bottom right. (See diagram)

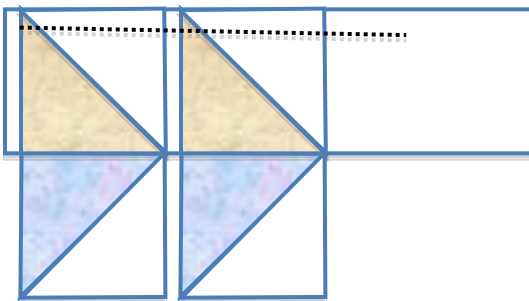

3. Sew the squares together along the A and B fabric. Sew half the units with a B fabric on top and half with an A fabric on top. (The diagonal seams should line up)

4. Press all seams in the open. This makes it easier to see where to sew so the point shows.

5. Lay and stitch 62 units right sides together onto 4 of the 2 1/2 " strips of background fabric as shown in the diagram

6. Cut the background fabric between the "flying geese" units. Press the seams away from the triangles.
7. Stitch the other side of the "flying geese units" to the remaining 2 1/2 " background fabric strips.

8. Cut the background fabric between the units and press the seams away from the triangles.

You will need 34 of the flying geese units (2 1/2 " x 4 1/2 ") with assorted fabric combinations and 62 units (2 1/2 " x 8 1/2 ") as shown below.
